

Good evening, SGTA.

I hope this email finds you well. Can you believe we are only 12 days into the new year?

I am writing to give you some updates about returning to work.

Here's some information from Jim:

- Air Quality Measures-We will be working on **Monday** to address filter changes in the air purifiers.
- N95 masks have been distributed to all sites and will be available to staff who may need them.
- Specific concern about JMS-The team will investigate the rooms as quickly as possible regarding a smoke smell.

Please note the schedule change is for this week only. (All sites will follow their Wednesday schedule on Monday. There will be no CPT for elementary schools all week.)

I have been working with Ross for the past few days on an MOU regarding PN days for our members who've been impacted by the wildfire. He emailed it out earlier today and I have linked it below. **Please consider donating hours to members who may need additional time to recover.** Look for a form from Ross tomorrow.

Our Executive Board has also discussed what we need to do to be able to make a donation to our affected members as well.

Please let me know if you have any further questions or concerns by responding to this message or by reaching out to your site reps.

Thank you for all you do. Stay safe!

Lisa
